Subject index

Albumin,
complex formation of amino acids and proteins with silver ions (Vidugiris et al.) 513
Alkaline phosphatase,
complex formation of amino acids and proteins with silver ions (Vidugiris et al.) 513
Amino acids,
complex formation of ——— and proteins with silver ions (Vidugiris et al.) 513
Antitumour platinum drugs,
electrochemical analysis of ——— and their complexes with DNA (Vrána, Brabec) 145
ATP,
a firefly electrode: a physico-chemical model for the control of emission of light through the ——— pump (Limaye et al.) 21
ATPase,
electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XII. K^+-dependent ——— activity (arguments for the structural association of H^+-ATPase with K^+-ionophore) (Martirosov et al.) 353

Bacteriophages,
depolarization of *Escherichia coli* cytoplasmic membrane by ——— T4 and lambda: evidence for induction of ion-permeable channels (Grinius, Daugelavičius) 235
Bilayer lipid membrane,
electrical oscillations in polypyrrole–lecithin ——— (Kotowski et al.) 283
Immobilization of glucose oxidase on a polypyrrole–lecithin ——— (Kotowski et al.) 277
Mechanism of the formation of the electrical potential on the ——— induced by propranolol and verapamil (Antonenko, Yaguzhinsky) 499
Polymer-modified ———: the polypyrrole–lecithin system (Janas et al.) 405
Some electrochemical studies on charge transfer of TCNQ modified BLMs (Krysinski, Tien) 227
Bile,
effect of electrical fields on liver functionality and ——— secretion. Preliminary results (Chanussot et al.) 67
Bioluminescence,
evidence for two parallel mechanisms operating in the production of the excited state in electrobioluminescence of *Lampito mauritii* (Limaye, Santhanam) 9
Biosynthesis,
electrochemical model for the stimulation of ——— by external electric fields (Blank, Goodman) 569
Biotechnology,
applications of bioelectrochemistry in medicine (Review) (Milazzo) 191
Breakdown of protoplast membranes,
electrical ——— under different osmotic pressures (Zhelev et al.) 217

Carbon,
electrochemical transformations of proteins adsorbed at ——— electrodes (Bogdanovskaya et al.) 581
Catalase,
a new property of ———: the concerted synthesis of nucleotide triphosphates (Vuillaume et al.) 541
Ceruloplasmin,
complex formation of amino acids and proteins with silver ions (Vidugiris et al.) 513
Charge transfer,
some electrochemical studies on ——— of TCNQ modified BLMs (Krysinski, Tien) 227
Chlorophyll,
a photoelectrochemical cell with oriented pigment–polymer complexes (Frąckowiak et al.) 371

Cholic acids,
behaviour study of some ——— at the dropping mercury electrode using differential pulse polarography (Ferri et al.) 263
Chymotrypsin,
trace measurements of the disulphide proteins trypsin and ——— based on adsorptive stripping voltammetry (Wang et al.) 39
Complexation,
application of polarography to the study of ——— and stacking interactions of bases in the B–Z helical transition of poly[d(G–C)] and poly[d(G–m^5C)] induced by Ni(II) and Mn(II) (Elżanowska, Van de Sande) 441
Corrosion studies,
applications of bioelectrochemistry in medicine (Review) (Milazzo) 191
Cytochrome *c*,
electrochemical transformations of proteins adsorbed at carbon electrodes (Bogdanovskaya et al.) 581
FAD used as a mediator in the electron transfer between platinum and several biomolecules (Durliat et al.) 413
Cytoplasmic membrane,
depolarization of *Escherichia coli* ——— by bacteriophages T4 and lambda: evidence for induction of ion-permeable channels (Grinius, Daugelavičius) 235

Diagnostics,
applications of bioelectrochemistry in medicine (Review) (Milazzo) 191
Dielectrophoresis,
what is " ——— "? (Barnaby et al.) 347
DNA,
electrochemical analysis of antitumour platinum drugs and their complexes with ——— (Vrána, Brabec) 145

Earthworm electrode,
evidence for two parallel mechanisms operating in the production of the excited state in electrobioluminescence of *Lampito mauritii* (Limaye, Santhanam) 9
Electrofusion,
——— of large volumes of cells in culture. Part I. Anchorage-dependent strains (Teissié, Conte) 49
——— of large volumes of cells in culture. Part II. Cells growing in suspension (Teissié, Rols) 59
Hybridoma production by means of ——— — an experimental report (Abel et al) 173
Electrorotation,
evaluation of the data of simple cells by ——— using square-topped fields (Gimsa et al.) 389
Endothelial cells,
electrical impedance measurements of ——— grown at an electrode under hemodynamic stress (Tamisier et al.) 207
Enzyme,
oscillations in open two-michaelian-——— systems (Vincent et al.) 247
Escherichia coli,
depolarization of ——— cytoplasmic membrane by bacteriophages T4 and lambda: evidence for induction of ion-permeable channels (Grinius, Daugelavičius) 235
Electrochemical study of energy-dependent potassium accumulation in ———. Part XII. K^+-dependent ATPase activity (arguments for the structural association of H^+-ATPase with K^+-ionophore) (Martirosov et al.) 353
Estazolam,
polarographic study of the hydrolysis of a triazolobenzodiazepine, ——— (Jimenez et al.) 533
Excited state,
evidence for two parallel mechanisms operating in the production of the ——— in electrobioluminescence of *Lampito mauritii* (Limaye, Santhanam) 9

Ferredoxin,
FAD used as a mediator in the electron transfer between platinum and several biomolecules (Durliat et al.) 413
Firefly electrode,
a ———: a physico-chemical model for the control of emission of light through the ATP pump (Limaye et al.) 21
Flavin adenine dinucleotide,
——— used as a mediator in the electron transfer between platinum and several biomolecules (Durliat et al.) 413

Glucose oxidase,
electrochemical transformations on proteins adsorbed at carbon electrodes (Bogdanovskaya et al.) 581
FAD used as a mediator in the electron transfer between platinum and several biomolecules (Durliat et al.) 413
Immobilization of ——— on a polypyrrole–lecithin bilayer lipid membrane (Kotowski et al.) 277

Glutamic acid,
biochemical basis of a kinetically controlled microbial sensor (Riedel et al.) 137
Gramicidin A,
dependence of tracer-determined permeability coefficients of ——— -treated red blood cell membranes and lipid bilayers on the ionic composition of the media (Blaskó et al.) 127

Head groups,
effect of interactions in the ——— on monolayer structure and permeability (Miller, Yavin) 557
Helical transition,
applications of polarography to the study of complexation and stacking interactions of bases in the B–Z ——— of poly[d(G–C)] and poly[(G–m^5C)] induced by Ni(II) and Mn(II) (Elżanowska, Van de Sande) 441
Hemodynamic stress,
electrical impedance measurements of endothelial cells grown at an electrode under ——— (Tamisier et al.) 207
Hemoglobin,
spectroelectrochemistry of the quasi-reversible reduction and oxidation of ——— at a methylene blue adsorbed modified electrode (Song, Dong) 337
Horse radish peroxidase,
electrochemical transformations of proteins adsorbed at carbon electrodes (Bogdanovskaya et al.) 581
Hybridoma,
——— production by means of electrofusion – an experimental report (Abel et al.) 173
Hydroxyl,
a model for passive transport of H^+ and OH^- across lipid membranes (Miller) 359

Impedance,
electrical ——— measurements of endothelial cells grown at an electrode under hemodynamic stress (Tamisier et al.) 207
Ionophore,
electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XII. K^+-dependent ATPase activity (arguments for the structural association of H^+-ATPase with K^+- ———) (Martirosov et al.) 353
Ion-pair formation,
——— in aqueous solutions of pyruvate anions. Polarographic study (Zuman, German) 29
Ion-permeable channels,
depolarization of *Escherichia coli* cytoplasmic membrane by bacteriophages T4 and lambda: evidence for induction of ——— (Grinius, Daugelavičius) 235

Laccase,
electrochemical transformations on proteins adsorbed at carbon electrodes (Bogdanovskaya et al.) 581
Lampito mauritii,
evidence for two parallel mechanisms operating in the production of the excited state in electrobioluminescence of ——— (Limaye, Santhanam) 9
Lecithin,
electrical oscillations in polypyrrole–——— bilayer lipid membranes (Kotowski et al.) 283
Immobilization of glucose oxidase on a polypyrrole–——— bilayer lipid membrane (Kotowski et al.) 277
Polymer-modified bilayer lipid membranes: the polypyrrole–——— system (Janas et al.) 405
Lectins,
the effects of low frequency pulsing electromagnetic fields on the response of human lymphocytes to ———. Changes at different values of induced electrical tension (Cadossi et al.) 315
Ligands,
site-binding model with long-range co-operative interaction for a polyion with large and small ionic ——— in competition (Weller) 77
Light emission,
a firefly electrode: a physico-chemical model for the control of ——— through the ATP pump (Limaye et al.) 21
Lipid bilayer,
dependence of tracer-determined permeability coefficients of gramicidin A-treated red blood cell membranes and ——— on the ionic composition of the media (Blaskó et al.) 127
Electrical oscillations in polypyrrole–lecithin bilayer lipid membranes (Kotowski et al.) 283
Immobilization of glucose oxidase on a poly-

pyrrole–lecithin bilayer lipid membrane (Kotowski et al.) 277
Some electrochemical studies on charge transfer of TCNQ modified BLMs (Krysinski, Tien) 227
Lipid membranes,
a model for passive transport of H^+ and OH^- across ——— (Miller) 359
Lipid swelling,
——— and liposome formation mediated by electric fields (Dimitrov, Angelova) 323
Liposome,
lipid swelling and ——— formation mediated by electric fields (Dimitrov, Angelova) 323
Liquid membrane,
spike membrane potential in a ——— system induced by pH-jump. Part I. Mechanism of generation of peak potential (Nomura et al.) 291
Spike membrane potential in a ——— system induced by pH-jump. Part II. Theory for relaxation of the peak potential (Ma et al.) 301
Liver,
effect of electrical fields on ——— functionality and bile secretion. Preliminary results (Chanussot et al.) 67
Lymphocytes,
effects of low frequency pulsing electromagnetic fields on the response of human ——— to lectins. Changes at different values of induced electrical tension (Cadossi et al.) 315

Maltose,
biochemical basis of a kinetically controlled microbial sensor (Riedel et al.) 137
Manganese,
application of polarography to the study of complexation and stacking interactions of bases in the B–Z helical transition of poly[d(G–C)] and poly[d(G–m^5C)] induced by Ni(II) and Mn(II) (Elżanowska, Van de Sande) 441
Medicine,
applications of bioelectrochemistry in ——— (Review) (Milazzo) 191
Membrane potentials,
electroinduction of long-lived ——— in yeasts (Tomov, Tsoneva) 397
Mercaptide,
electrochemical characterization of metallothionein metal–——— complexes: application of cyclic voltammetry to investigation of metalloproteins (Olafson) 111
Mercury,
behaviour study of some cholic acids at the dropping ——— electrode using differential pulse polarography (Ferri et al.) 263
Metalloproteins,
electrochemical characterization of metallothionein metal–mercaptide complexes: application of cyclic voltammetry to investigation of ——— (Olafson) 111
Metallothionein,
electrochemical characterization of ——— metal–mercaptide complexes: application of cyclic voltammetry to investigation of metalloproteins (Olafson) 111
Methemoglobin,
complex formation of amino acids and proteins with silver ions (Vidugiris et al.) 513
FAD used as a mediator in the electron transfer between platinum and several biomolecules (Durliat et al.) 413
4-Methoxy-1,2-benzoquinone,
the electrochemistry of aqueous solutions of ——— (Bailey et al.) 521
Methylene blue,
spectroelectrochemistry of the quasi-reversible reduction and oxidation of hemoglobin at a ——— adsorbed modified electrode (Song, Dong) 337
1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine,
electrochemical study of the neurotoxin ——— and its oxidation products (Linkous et al.) 477
Microbial sensor,
biochemical basis of a kinetically controlled ——— (Riedel et al.) 137
Monolayer permeability,
effect of interactions in the head groups on monolayer structure and ——— (Miller, Yavin) 557
Monolayer structure,
effect of interactions in the head groups on ——— and permeability (Miller, Yavin) 557
Morphogenesis,
redox-responsive electrodes applied during plant ——— (Levengood) 461

Neurotoxin,
electrochemical study of the ——— 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine

and its oxidation products (Linkous et al.) 477
Nickel,
application of polarography to the study of complexation and stacking interactions of bases in the B–Z helical transition of poly[d(G–C)] and poly[d(G–m^{5}C)] induced by Ni(II) and Mn(II) (Elżanowska, Van de Sande) 441
Nucleic acid,
application of polarography to the study of complexation and stacking interactions of bases in the B–Z helical transition of poly[d(G–C)] and poly[d(G–m^{5}C)] induced by Ni(II) and Mn(II) (Elżanowska, Van de Sande) 441
Complexation of bases and phosphates of ——— components by transition metal ions (Elżanowska, Van de Sande) 425
Model simulation of the ionic strength dependence of ———–protein interactions (Petri et al.) 95
Nucleotide triphosphates,
a new property of catalase: the concerted synthesis of ——— (Vuillaume et al.) 541

Oscillations,
electrical ——— in polypyrrole–lecithin bilayer lipid membranes (Kotowski et al.) 283
——— in open two-michaelian-enzyme systems (Vincent et al.) 247
Osmotic effects,
lipid swelling and liposome formation mediated by electric fields (Dimitrov, Angelova) 323
Osmotic pressures,
electrical breakdown of protoplast membranes under different ——— (Zhelev et al.) 217

Peptide,
biochemical basis of a kinetically controlled microbial sensor (Riedel et al.) 137
Permeability coefficients,
dependence of tracer-determined ——— of gramicidin A-treated red blood cell membranes and lipid bilayers on the ionic composition of the media (Blaskó et al.) 127
Peroxidase,
complex formation of amino acids and proteins with silver ions (Vidugiris et al.) 513
pH-jump,
spike membrane potential in a liquid membrane system induced by ———. Part I. Mechanism of generation of peak potential (Nomura et al.) 291
Spike membrane potential in a liquid membrane system induced by ———. Part II. Theory for relaxation of the peak potential (Ma et al.) 301
Pigment,
a photoelectrochemical cell with oriented ———–polymer complexes (Frąckowiak et al.) 371
Platinum,
electrochemical analysis of antitumour ——— drugs and their complexes with DNA (Vrána, Brabec) 145
FAD used as a mediator in the electron transfer between ——— and several biomolecules (Durliat et al.) 413
Polyion,
site-binding model with long-range co-operative interaction for a ——— with large and small ionic ligands in competition (Weller) 77
Polymer,
——— modified bilayer lipid membranes: the polypyrrole–lecithin system (Janas et al.) 405
Polypyrrole,
electrical oscillations in ———–lecithin bilayer lipid membranes (Kotowski et al.) 283
Immobilization of glucose oxidase on a ———–lecithin bilayer lipid membrane (Kotowski et al.) 277
Polymer-modified bilayer lipid membranes: the ———–lecithin system (Janas et al.) 405
Potassium,
electrochemical study of energy-dependent ——— accumulation in *E. coli*. Part XII. K^+-dependent ATPase activity (arguments for the structural association of H^+-ATPase with K^+-ionophore) (Martirosov et al.) 353
Propranolol,
mechanism of the formation of the electrical potential on the bilayer lipid membrane induced by ——— and verapamil (Antonenko, Yaguzhinsky) 499
Proteins,
complex formation of amino acids and ——— with silver ions (Vidugiris et al.) 513
Electrochemical transformations of ——— adsorbed at carbon electrodes (Bogdanovskaya et al.) 581

Model simulation of the ionic strength dependence of nucleic acid–——— interaction (Petri et al.) 95
Trace measurements of the disulphide ——— trypsin and chymotrypsin based on adsorptive stripping voltammetry (Wang et al.) 39
Protein synthesis,
electrochemical model for the stimulation of biosynthesis by external electric fields (Blank, Goodman) 569
Proton,
a model for passive transport of H^+ and OH^- across lipid membranes (Miller) 359
Protoplast membranes,
electrical breakdown of ——— under different osmotic pressures (Zhelev et al.) 217
Pulsing electromagnetic fields,
effects of low frequency ——— on the response of human lymphocytes to lectins. Changes at different values of induced electrical tension (Cadossi et al.) 315
Pyruvate,
ion-pair formation in aqueous solutions of ——— anions. Polarographic study (Zuman, German) 29

Ranitidine,
DPP study of ——— permeability (Nuñez-Vergara et al.) 505
Red blood cell,
dependence of tracer-determined permeability coefficients of gramicidin A-treated ——— membranes and lipid bilayers on the ionic composition of the media (Blaskó et al.) 127
Redox-responsive electrodes,
——— applied during plant morphogenesis (Levengood) 461
RNA transcription,
electrochemical model for the stimulation of biosynthesis by external electric fields (Blank, Goodman) 569

Silver,
complex formation of amino acids and proteins with ——— ions (Vidugiris et al.) 513
Site-binding model,
model simulation on the ionic strength dependence of nucleic acid–protein interaction (Petri et al.) 95
——— with long-range co-operative interaction for a polyion with large and small ionic ligands in competition (Weller) 77
Spike membrane potential,
——— in a liquid membrane system induced by pH-jump. Part I. Mechanism of generation of peak potential (Nomura et al.) 291
——— in a liquid membrane system induced by pH-jump. Part II. Theory for relaxation of the peak potential (Ma et al.) 301
Square-topped fields,
evaluation of the data of simple cells by electrorotation using ——— (Gimsa et al.) 389
Stacking interactions,
applications of polarography to the study of complexation and ——— of bases in the B–Z helical transition of poly[d(G–C)] and poly[d(G–m^5C)] induced by Ni(II) and Mn(II) (Elżanowska, Van de Sande) 441
Standard electrode system,
comparative study between a two-compartment cell and the ——— (Chen, Tien) 491
Stilbazolium merocyanines,
a photoelectrochemical cell with oriented pigment–polymer complexes (Frąckowiak et al.) 371
Superoxide,
stabilisation of ——— ion in aqueous media by tryptophan (Renukambal, Shakuntala) 161

TCNQ,
some electrochemical studies on charge transfer of ——— modified BLMs (Krysinski, Tien) 227
Therapeutics,
applications of bioelectrochemistry in medicine (Review) (Milazzo) 191
Transition metal,
complexation of bases and phosphates of nucleic acid components by ——— ions (Elżanowska, Van de Sande) 425
Triazolobenzodiazepine,
polarographic study of the hydrolysis of a ———, Estazolam (Jimenez et al.) 533
Trypsin,
trace measurements of the disulphide proteins ——— and chymotrypsin based on adsorptive stripping voltammetry (Wang et al.) 39
Tryptophan,
stabilisation of superoxide ion in aqueous media by ——— (Renukambal, Shakuntala) 161

Two-compartment cell,
comparative study between a ——— and the standard electrode system (Chen, Tien) 491
Two-michaelian-enzyme systems,
oscillations in open ——— (Vincent et al.) 247

Verapamil,
mechanism of the formation of the electrical potential on the bilayer lipid membrane induced by propranolol and ——— (Antonenko, Yaguzhinsky) 499

Yeasts,
electroinduction of long-lived membrane potentials in ——— (Tomov, Tsoneva) 397
